

The Funnel

Many enter, few arrive, and the difference leaks out the sides. The funnel's job is to make ONE leak undeniable, so this quarter has one job.

1 Your example

2 MIN

What journey are you funneling?

Stranger to client, applicant to hire, reader to buyer.

2 The four stages

WITH REAL NUMBERS

Stage 1: name (traveller's point of view) + last month's real number

Stage 2: name (traveller's point of view) + last month's real number

Stage 3: name (traveller's point of view) + last month's real number

Stage 4: name (traveller's point of view) + last month's real number

3 The leak

ONE, NOT FOUR

Between which two stages do you lose the most?

Divide each stage by the one above. The worst ratio is THE leak.

Why do they fall out there, in the traveller's words?

The one fix this quarter

One change aimed at one leak.

The punchline

Usually: you don't have a traffic problem, you have a [leak stage] problem.
